Dräger Panorama Nova EPDM RA

ST-463-2000

Dräger Panorama Nova Silicone RA

The Panorama Nova RA full face mask offers reliable protection for the respiratory system and the eyes. In combination with a compressed-air breathing apparatus as insulating equipment it is also used by fire brigades as a proven respirator.

The Panorama Nova RA full face mask is used at the workplace when hazardous substances are being handled which can damage not only the respiratory system but also the eyes.

In atmospheres with at least 17% by volume oxygen and known concentrations of hazardous substances the Panorama Nova RA is used with respiratory filters.

If these conditions do not apply, the Panorama Nova RA can be used together with a compressed-air breathing apparatus (normal pressure) as insulating equipment.

The comfortable 5-point-harness makes it particularly easy to quickly don the mask.

In addition, the double sealing frame ensures an optimal fit and therefore increased safety. The visor is made of polycarbonate, the mask body of silicone or EPDM. This means that the Panorama Nova RA can be easily adapted to your special requirements.

The universal range of applications covered by the mask and the effortless maintenance of all mask parts make the Panorama Nova RA the preferred breathing apparatus in particular in the fire service.

Dräger Panorama Nova RA – another quality product from Dräger Safety.

TECHNICAL DATA

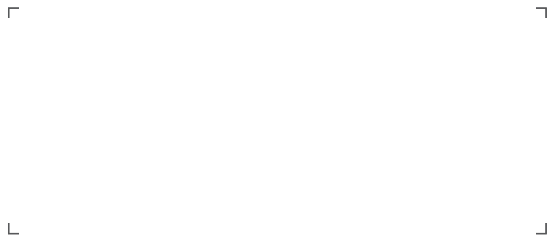

Mask body	either EPDM or silicone
Visor	either impact-resistant polycarbonate, coated polycarbonate
Connector	made of robust plastic with inhalation and exhalation valve Standard thread connector Rd 40x1/7" in accordance with EN 148-1
Weight	approx. 550-650 g (depending on the visor)
Tested and approved	in accordance with EN 136 Class 3 (CE symbol), NIOSH, AS/NZS
